EDUCATION

Dr. APJ Abdul Kalam Technical University

B.Tech in Computer Science & Engineering (Artificial Intelligence)

Uttar Pradesh, India

May 2026

Balvantray Mehta Vidya Bhawan (ASMA)

CBSE Class 12th

Delhi, India

2022

EXPERIENCE

Team Computers

Software Developer

Noida, India

Jul 2026 – Present

- Transitioned to a full-time role following internship, leading full-stack development initiatives for enterprise IT solutions.

Full-Stack Developer Intern

Jan 2026 – Jun 2026

- Engineered and maintained **ZerofAI**, an enterprise-grade IT chatbot platform utilizing **Electron**, **Rasa NLU**, and **Django REST Framework** across 50,000+ operational endpoints.
- Architected **Python automation scripts** for silent deployments and log diagnostics in Windows environments, optimizing technical support workflows and resolving critical VPN and Outlook issues.
- Integrated **Active Directory** via **LDAP3** to automate account recovery processes, implementing **AES encryption** for secure REST API credential transmission.
- Optimized frontend performance by refactoring dashboards with **React.js** and **RTK Query**, resolving complex authentication bottlenecks and enhancing internal tool reliability.
- Tech:** *Python, Django, React.js, Redux Toolkit, Electron, Rasa, REST, PostgreSQL, Windows Automation*

PROJECTS

Veritas-RAG: Enterprise Knowledge Intelligence Suite | *Python, LangChain, FAISS, Gemini API* Jun 2025

- Designed and deployed Veritas-RAG, an enterprise-grade knowledge intelligence suite built with **Python**, **LangChain**, and **FAISS**, enabling rapid semantic information retrieval across 500+ corporate assets to accelerate decision-making with **92%** accuracy.
- Architected a high-performance vector embedding pipeline using **Sentence-Transformers**, reducing document query latency to under **350ms** through advanced chunking and optimized **cosine similarity search** strategies.
- Engineered a secure **Google Gemini API** integration with **custom prompt engineering** to synthesize complex insights from unstructured data, successfully mitigating model hallucinations by **40%** in high-stakes operational environments.

Geonix – Geofencing Attendance Platform | *React, TypeScript, Django REST, PostgreSQL* Dec 2025

- Engineered and deployed a full-stack attendance platform using **React (Vite)**, **TypeScript**, **Redux Toolkit**, **Django REST Framework**, and **PostgreSQL**, with deployment across 2 cloud environments (**Vercel** frontend + **Render** backend).
- Designed backend architecture with **6 ViewSets**, **4 APIViews**, and 10 custom action endpoints across accounts, organizations, geofencing, and attendance modules to support role-based operational workflows.
- Built modular frontend service layer with **5 dedicated API service modules (auth, api, attendance, employee, geofencing)** and reusable component patterns, improving maintainability and accelerating feature integration.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, Windows Batch Scripting

Frameworks & Libraries: React.js, Node.js, Django, Express.js, Redux Toolkit, RTK Query, Electron.js, Rasa (NLU), NumPy, Pandas, Matplotlib, LangChain, Sentence-Transformers

Databases: MongoDB, SQL, PostgreSQL, FAISS (Vector DB)

AI/ML & RAG: Retrieval-Augmented Generation (RAG), LLM Integration (Gemini API), Semantic Search, Cosine Similarity, Vector Embeddings, Prompt Engineering

Dev Tools & Platforms: Git, GitHub, VS Code, Postman, Windows Services, CI/CD basics

Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
